

Welcome to Greenland Airports

Mittarfeqarfiit, Greenland Airports, operates 13 airports and 46 helicopter landing sites in Greenland. With a staff of around 420, we are one of the largest employers in Greenland. We constantly strive to ensure optimum safety and conditions for visiting aircrafts and pilots.

Our airports are ideal choices for smaller airplanes operation in the north Atlantic regions. On these pages we are presenting information on our airport services dedicated to ferry companies and ferry pilots. It is a high priority for us to ensure good conditions for operators on the north Atlantic routes and we have during 2014 launched several new services to do so. For example, all our airports now accept all major credit cards (for instance Visa, MasterCard, JCB and American Express, now even without the use of pin code) and we offer free Internet access for a limited period in all airports (not Wi-Fi).

Attached are our Fees and Charges for the use of Airports and Heliports in Greenland 2015 for ferry planes and a map showing our airports locations and contact information.

In this document you will find detailed information about our airports for pilots and route planners. On the following pages we have presentations of our airport facilities and in three separate documents there is more detailed information about our most visited airports for ferry traffic: Kangerlussuaq, Narsarsuaq and Kulusuk. Please note that the following information should not be used for flight planning. Please consult aim.naviair.dk and www.mit.gl for updated information.
